BAISHAMEN PARK YOUNG NATURE EXPLORERS

Can you find all of these animals and plants in Baishamen park?

Tick the box once spotted

Red-whiskered Bulbul

Very common in the park, listen out for their three or four note call

Monkey Pod Tree

There's not many in the park but you'll find this odd looking flower around the marsh areas

Swinhoe's White-eye

These tiny birds blend in perfectly with the green leaves listen for their high pitch call

Oriental Magpie-Robin

These clever birds have also been known to sing other birds songs

Maritime Striped Squirrel

A species in the rodent family these little critters love climbing trees.

Bur Marigolds

This plant is usually found growing in wetlands and near rivers

Common Lanata

You'll also find this plant in Mexico, Central America and the Carribean

Sensitive Plants (Mimosa)

This plant really is sensitive it won't cry but if you touch it then its leaves will close up.

Chinese Fan Palm

This giant palms can reach 30-40 feet and live as long as 40 years old.

Trailing Daisy

Last on the list but one of the easiest to find - You'll find these bright yellow flowers everywhere in Hainan.

Did you find them all? Which was the most difficult to find?

When you have completed your sheet - send it to jake@tropicalhainan.com and I'll email you back your Baishamen park young nature explorers certificate.
